elōs™ Fractional

the beauty of fractional wrinkle treatment with elōs

It's a fact of life. As we age, the natural substances that provide the skin with structure and volume decrease. The skin loses its ability to retain moisture and elasticity; therefore it sags and forms wrinkles. Fractional Wrinkle Treatment with elōs technology offers superior results with the highest levels of comfort and safety.

elōs fractional treatments

Refresh the appearance of areas around your cheeks and eyes.

Smooth lines around your nose and mouth.

How does elōs Fractional Wrinkle Treatment work?

The combined energies of elōs technology precisely heat the connective tissue within the target treatment area. This stimulates collagen production and produces a younger appearance in the skin. Mild to moderate wrinkles are reduced, and the texture of your skin becomes more smooth and elastic.

When can I expect to see results?

Most patients start to notice improvement of wrinkles between 2-3 treatment sessions. Some patients note improvement even after the first treatment. The total number of required treatment sessions depends on your skin's condition.

Is elōs Fractional Wrinkle Treatment right for me?

elōs Fractional Wrinkle Treatment is a safe and effective solution for most skin types.

Does it hurt?

Most patients undergo the procedure easily. In addition, topical anesthetic cream and external cooling can be used to increase your comfort level. A built-in cooled treatment tip ensures constant skin surface protection during the treatment. Many patients return to normal activities immediately after treatment.

How much does it cost?

Treatment costs vary. Schedule a personalized consultation for more details.
